Breath testing log

Practitioner name

From / / To / /

Australian Health Practitioner Regulation Agency

Breath alcohol supervisors should immediately notify the practitioner's case officer if they have any concerns about the practitioner's performance or conduct.

The practitioner must undertake breath alcohol testing (breath testing) in accordance with AHPRA's protocol for drug and alcohol screening (the protocol) as follows:

- a. No more than 30 minutes prior to the commencement of each and every period of practice, and
- b. No more than 30 minutes after the completion of each and every period of practice, and
- c. At any time within the practice period as directed by the case officer or breathalyser supervisor.

Where the result of a breath test undertaken is greater than 0.01% blood alcohol concentration the practitioner must not commence/immediately cease practice and must not return to practice that day. In the event of a cessation of practice due to a positive BAC result AHPRA must be notified immediately.

Note to breath alcohol supervisor:
By signing this register, you attest to:

- a. the breath testing has been carried out in accordance with the operating procedure of the device
- b. you were present and directly observed the breath alcohol testing
- c. the information recorded in this log book is true and accurate, and
- d. your awareness that a breath alcohol supervisor may require breath alcohol testing at any time outside these requirements where a concern exists.
