---

I would like to see a more streamlined process for SIMG as suggested but I would add in the need for application of a limited provider number to these SIMG to practice and stay in areas where the shortages are:

For me here in our state it is rural areas and anaesthesia that are in dire need of senior anaesthesia skills

I would also liked to see the "Area of need" category wrestled away from the colleges and given to the health departments that run rural areas so they can sort out there own AON locations as they see fit without impedance from

Examples to support these statements can be given upon request

Regards
