RE: Draft revised Registration standard: Continuing professional development

Dear Anne,

RACMA is thankful to the Medical Board of Australia, for providing our college an opportunity to provide feedback on this important consultation paper.

We have re-visited the draft revised registration standard and after further consultation with the Continuous Education Program Committee, who have the responsibility for setting CPD standards and requirements for our members, we are satisfied that the draft addresses CPD arrangements and requirements for medical practitioners. Accordingly, we have no further comments or feedback to provide.

If I can be of any further assistance to provide further information on this matter, please do not hesitate to contact me.

Sincerely,

Melanie Saba
Chief Executive
