APRA is suggesting 50 hours cpd per year Gp are struggling to survive  
50 hours equates to 7500 dollars per year extra cost to Gp How do you suggest to to get this amount Can you prove this  
is going to improve patients care and reduce cost to Medicare Your proposal will force lots of Seniors Gp stop practicing  
and create shortage of experienced doctors Please re think about your proposal of CPD Thanks Awaiting your reply Dr
