Standard 1: Thinks critically and analyses nursing practice

Registered nurses use a variety of thinking strategies and the best available evidence in making decisions and providing safe, quality nursing practice within person-centred and evidence-based frameworks. The registered nurse:

Criteria	Examples
<p>1.1 accesses, analyses, and uses the best available evidence, that includes research findings, for safe, quality practice</p>	<p>Please provide detailed examples of how you have met each criteria. Examples can be from roles or activities you have undertaken since your last nursing position, and where you have used your knowledge and skills as a nurse. If you do not have examples, please leave the section blank.</p>
<p>1.2 develops practice through reflection on experiences, knowledge, actions, feelings and beliefs to identify how these shape practice</p>	
<p>1.3 respects all cultures and experiences, which includes responding to the role of family and community that underpin the health of Aboriginal and Torres Strait Islander peoples and people of other cultures</p>	

<p>1.4 complies with legislation, regulations, policies, guidelines and other standards or requirements relevant to the context of practice when making decisions</p>	
<p>1.5 uses ethical frameworks when making decisions</p>	
<p>1.6 maintains accurate, comprehensive and timely documentation of assessments, planning, decision-making, actions and evaluations</p>	
<p>1.7 contributes to quality improvement and relevant research</p>	

Standard 2: Engages in therapeutic and professional relationships

Registered nurse practice is based on purposefully engaging in effective therapeutic and professional relationships. This includes collegial generosity in the context of mutual trust and respect in professional relationships. The registered nurse:

<p>Criteria</p>	<p>Examples Please provide detailed examples of how you have met each criteria. Examples can be from roles or activities you have undertaken since your last nursing position, and where you have used your knowledge and skills as a nurse. If you do not have examples, please leave the section blank.</p>
<p>2.1 establishes, sustains and concludes relationships in a way that differentiates the boundaries between professional and personal relationships</p>	
<p>2.2 communicates effectively, and is respectful of a person's dignity, culture, values, beliefs and rights</p>	
<p>2.3 recognises that people are the experts in the experience of their life</p>	

<p>2.4 provides support and directs people to resources to optimise health-related decisions</p>	
<p>2.5 advocates on behalf of people in a manner that respects the person's autonomy and legal capacity</p>	
<p>2.6 uses delegation, supervision, coordination, consultation and referrals in professional relationships to achieve improved health outcomes</p>	
<p>2.7 actively fosters a culture of safety and learning that includes engaging with health professionals and others, to share knowledge and practice that supports person-centred care</p>	
<p>2.8 participates in and/or leads collaborative practice</p>	
<p>2.9 reports notifiable conduct of health professionals, health workers and others</p>	

Standard 3: Maintains the capability for practice

Registered nurses, as regulated health professionals, are responsible and accountable for ensuring they are safe, and have the capability for practice. This includes ongoing self-management and responding when there is concern about other health professionals' capability for practice.

Registered nurses are responsible for their professional development and contribute to the development of others. They are also responsible for providing information and education to enable people to make decisions and take action in relation to their health. The registered nurse:

<p>Criteria</p>	<p>Examples Please provide detailed examples of how you have met each criteria. Examples can be from roles or activities you have undertaken since your last nursing position, and where you have used your knowledge and skills as a nurse. If you do not have examples, please leave the section blank.</p>
<p>3.1 considers and responds in a timely manner to the health and wellbeing of self and others in relation to the capability for practice</p>	

<p>3.2 provides the information and education required to enhance people's control over health</p>	
<p>3.3 uses a lifelong learning approach for continuing professional development of self and others</p>	
<p>3.4 accepts accountability for decisions, actions, behaviours and responsibilities inherent in their role, and for the actions of others to whom they have delegated responsibilities</p>	
<p>3.5 seeks and responds to practice review and feedback</p>	
<p>3.6 actively engages with the profession</p>	
<p>3.7 identifies and promotes the integral role of nursing practice and the profession in influencing better health outcomes for people</p>	

Standard 4: Comprehensively conducts assessments

Registered nurses accurately conduct comprehensive and systematic assessments. They analyse information and data and communicate outcomes as the basis for practice. The registered nurse:

<p>Criteria</p>	<p>Examples Please provide detailed examples of how you have met each criteria. Examples can be from roles or activities you have undertaken since your last nursing position, and where you have used your knowledge and skills as a nurse. If you do not have examples, please leave the section blank.</p>
<p>4.1 conducts assessments that are holistic as well as culturally appropriate</p>	

<p>4.2 uses a range of assessment techniques to systematically collect relevant and accurate information and data to inform practice</p>	
<p>4.3 works in partnership to determine factors that affect, or potentially affect, the health and wellbeing of people and populations to determine priorities for action and/or for referral</p>	
<p>4.4 assesses the resources available to inform planning</p>	

Standard 5: Develops a plan for nursing practice

Registered nurses are responsible for the planning and communication of nursing practice. Agreed plans are developed in partnership. They are based on the registered nurses' appraisal of comprehensive, relevant information, and evidence that is documented and communicated. The registered nurse:

<p>Criteria</p>	<p>Examples Please provide detailed examples of how you have met each criteria. Examples can be from roles or activities you have undertaken since your last nursing position, and where you have used your knowledge and skills as a nurse. If you do not have examples, please leave the section blank.</p>
<p>5.1 uses assessment data and best available evidence to develop a plan</p>	
<p>5.2 collaboratively constructs nursing practice plans until contingencies, options priorities, goals, actions, outcomes and timeframes are agreed with the relevant persons</p>	
<p>5.3 documents, evaluates and modifies plans accordingly to facilitate the agreed outcomes</p>	

<p>5.4 plans and negotiates how practice will be evaluated and the time frame of engagement</p>	
<p>5.5 coordinates resources effectively and efficiently for planned actions</p>	

Standard 6: Provides safe, appropriate and responsive quality nursing practice

Registered nurses provide and may delegate, quality and ethical goal-directed actions. These are based on comprehensive and systematic assessment, and the best available evidence to achieve planned and agreed outcomes. The registered nurse:

<p>Criteria</p>	<p>Examples Please provide detailed examples of how you have met each criteria. Examples can be from roles or activities you have undertaken since your last nursing position, and where you have used your knowledge and skills as a nurse. If you do not have examples, please leave the section blank.</p>
<p>6.1 provides comprehensive safe, quality practice to achieve agreed goals and outcomes that are responsive to the nursing needs of people</p>	
<p>6.2 practises within their scope of practice</p>	
<p>6.3 appropriately delegates aspects of practice to enrolled nurses and others, according to enrolled nurse's scope of practice or others' clinical or non-clinical roles</p>	
<p>6.4 provides effective timely direction and supervision to ensure that delegated practice is safe and correct</p>	

<p>6.5 practises in accordance with relevant policies, guidelines, standards, regulations and legislation</p>	
<p>6.6 uses the appropriate processes to identify and report potential and actual risk related system issues and where practice may be below the expected standards</p>	

Standard 7: Evaluates outcomes to inform nursing practice

Registered nurses take responsibility for the evaluation of practice based on agreed priorities, goals, plans and outcomes and revises practice accordingly. The registered nurse:

<p>Criteria</p>	<p>Examples Please provide detailed examples of how you have met each criteria. Examples can be from roles or activities you have undertaken since your last nursing position, and where you have used your knowledge and skills as a nurse. If you do not have examples, please leave the section blank.</p>
<p>7.1 evaluates and monitors progress towards the expected goals and outcome</p>	
<p>7.2 revises the plan based on the evaluation</p>	
<p>7.3 determines, documents and communicates further priorities, goals and outcomes with the relevant persons</p>	

Declarations

I declare that the above mapping has been completed by myself and contains true and accurate information.
